- First of all, I wanna say Yushan is a really great TA! Although he said that this is his first time teaching a section, he did a perfect job! He is very knowledgable and his explanations about the questions are always clear and easily understandable. I also like how he would sometimes show us the way he thinks about a question, rather than just simply copying prof's notes. Don't have any harsh comments/complaints at all. I'd be willing to take his classes again if there's a chance haha.
- He is extremely helpful. I would not be doing so well in this class was it not for him. His office hours are always very insightful for the homeworks and he does not belittle anybody for any question. He constantly answers questions and also responds to emails. The discussion sections were also extremely helpful since he would explain things that are useful for the homework while simultaneously reviewing things that were convoluted during lecture. One of the best TA's I have had in a while.
- I liked having discussion to discuss HW questions.  
 Explanations of intuition behind theories also very helpful
- Very helpful and knowledgeable about this this class. Goes in depth and helps connect different topics so we can see the progression and how everything fits together.
- Very helpful in explaining homework material.
- Yushan was a great TA! His discussion section was very helpful for understanding the homework and further the concepts learned in lecture.

■ nice!
