- Han was a good TA who always was patient with my questions. I just wish sometimes he had looked at the hw before office hours, especially for coding problems since we sometimes had to spend a lot of time deciphering questions
  - I would prefer if addressed questions we had regarding homework and concepts before discussing whatever he had planned for the day. Explanations throughout the discussions were clear and easy to understand though and helpful for the learning process.
  - Our TA did a very good job on reviewing the lecture material and some homework problems. He really held very helpful discussion sections.
  - TA went through homework problems every week which is very good
  - The TA would go over problems in the discussion sections, but when asked about the homework questions or the code for the homework, he was usually unable to help or didn't know how to fix the problems. He told students to attend his office hours if we had such problems, but not everyone is able to attend office hours as they might have work or due to time difference.
  - Yushan is a great TA that really cares about how we're doing in class, as well as actually caring if we understand the content. I've had the privilege to learn from him in discussion, and he is also pretty active and easy to contact for questions on the material.
