2. Comments:

- 2.1) Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.
- Han is a super effective TA. He communicates his ideas extremely clearly. He always guides and encourages us to think about the problems on our own, while also giving an adequate amount of hints to help us. He knows the subjects of this course very well. Overall, Han is an excellent TA.
 - I really like to the review part of discussion! Han gave a short conclusion of what we learn every weeks, which helped me a lot to remember the algorithms.
 - I really liked how he went into examples that demonstrated algorithms with actual code to supplement the material we were being taught in class.
 - The discussions were very helpful in understanding the homework and the material, and I really enjoyed seeing the algorithms coded out since this class had very little of a programming component for an algorithms class, which happened a lot at the beginning of the quarter but less frequently at the end unfortunately.
 - Yushan was great! I appreciated how prepared he always was for discussion. Often bringing new problems to think about or reviewing lecture material in a clear and concise fashion.
